

IEWT – Ph.D. day

In the prelude to [IEWT 2025](#), a Ph.D. day takes place on **February 25th, 2025** (in English). We are looking forward to welcoming Ph.D. candidates in the field of energy economics, system analysis and modeling in Vienna, Austria.

During this full-day seminar, the focus will lie on the following:

- Getting feedback from senior researchers on your in-progress paper
- Discussions on applied methodology and framing of the research questions
- Improving effective paper writing
- Exchanging and networking with Ph.D. candidates in your field

How to participate?

- Submit title and abstract (~200 – 1000 words) by **November 22nd, 2024** ([here](#) or by e-mail to golab@eeg.tuwien.ac.at)
- You will get a notification of acceptance by **December 20th, 2024**
- Submit a draft of a full paper by **February 2nd, 2025**

Further details will be announced. Please contact Antonia Golab (golab@eeg.tuwien.ac.at) for further details.

FAQ: Is it possible to present the same content at the PhD day and at the IEWT conference?

Yes. The Ph.D. day will not encompass presentations in the same format as the conference. At the seminar, you will only present a short overview of your work and then rather focus on the draft of your planned publication. While the conference allows you to, first and foremost, share your work and connect from different fields of industry and research, the aim of the PhD day is the refinement of your scientific paper. Attendance at the IEWT conference is not a prerequisite for the participation of the Ph.D. day. Please submit your contributions for the PhD Day and the conference separately via the IEWT homepage, even if they cover the same topic.

FAQ: What classifies as a “draft of a full paper” here?

- The paper is in the process of being finished soon but not in its final form yet.
- The paper has not yet been submitted for publication.
- The structure, content, and “storyline” of the paper are clear, which is indicated by section and subsection titles, as well as the formulation of the content in the form of clearly understandable bullet points or at least partly finalized text.
- The methodology is clearly described.
- Addressed research questions are formulated and the presented key results have been at least preliminary visualized.
